SUBJECT: Analyses of Spring River and Syntex Samples

FROM: William J. Keffer *WJK/moz*
Chief, EP&R/ENSVTO: Charles Hensley
Chief, LABO/ENSV

Site:	<i>Syntex-Vermont</i>
ID #	<i>MOB 007452154</i>
Break:	<i>3.1</i>
Other:	<i>9-15-82</i>

As a supplement to the September 13, 1982, letter from ARWM to John Wicklund, we were informed by Scott Ritchey at 3:15 pm on September 13, that samples from Syntex and USGS will be picked up and delivered to the laboratory on September 15, 1982.

These samples are to consist of six sediment samples collected by USGS from the Spring River. These samples are to be analyzed for specific isomers and total 2,3,7,8-TCDD. Samples will be labelled in the series of AC-4301 to AC4310.

We will also transport back approximately 38 samples from Syntex trenches and associated areas. These samples are to be held until further instructions from ARWM

Requested date for completion of analysis will be provided by Mr. Ritchey.

cc: Scott Ritchey, WMBR/ARWM
